Re: The Bobby McIlvaine World Trade Center Investigation Act

Dear Member of Congress:

With this letter, we at Architects & Engineers for 9/11 Truth (AE911Truth) hereby graciously call upon you to introduce the Bobby McIlvaine World Trade Center Investigation Act.

Bobby McIlvaine, like 2,566 other innocent victims, was killed in the attacks on the World Trade Center on September 11, 2001. For more than a decade, his father, Bob McIlvaine, has been an outspoken leader in advocating for a new investigation of the events that took so many lives. Mr. McIlvaine joins us today in urging you to sponsor the Bobby McIlvaine Act.

We are a nonprofit organization that represents more than 3,000 architects and engineers—as well as thousands of concerned citizens—who are demanding a new and independent investigation of the collapse of the *three* World Trade Center towers.

Official reports published by the Federal Emergency Management Agency (FEMA) and the National Institute of Standards and Technology (NIST) claim that the World Trade Center Twin Towers collapsed due to the airplane impacts and the ensuing fires. These reports also assert that normal office fires alone caused the sudden, symmetrical, free-fall collapse of the 47-story World Trade Center Building 7 (WTC 7) later that day.

However, numerous well-respected scientists, structural engineers, high-rise architects, and researchers have categorically refuted these conclusions. They have developed an overwhelming body of evidence that instead points to the use of explosives and incendiaries in bringing down these three robust structures. And, in just a few months' time, the results of a computer modeling study by researchers at the University of Alaska Fairbanks—which our organization has funded—will be released, demonstrating conclusively that fires could not have caused WTC 7's collapse.

Now, seventeen years later, it is high time for the U.S. Congress to open an unbiased investigation and use its subpoena power to uncover the full truth surrounding the destruction of the Twin Towers and WTC 7. Only when the truth is known can our nation heal the wounds of that day and return to its pre-9/11 respect for life, liberty, and justice for all.

Thank you for your consideration of this most important matter.

Sincerely,

Richard Gage, AIA
